

Memory Game

Schleich 

Entry Level:

Step 1: Start with 3 to 4 animals, set timer for 5 seconds for your child to memorize them

Step 2: Ask your child to close eyes (no peaking!) Then remove 1 animal

Step 3: Tell your child to open their eyes, and ask them which animal is missing

Step 4: When the correct answer is said, move on to the next level by adding more animals and switching positions to make it more challenging!

Mid Level: Set a timer and ask your child to memorize all the animals listed, then either cover them up or simply ask your child to keep eyes closed until (he / she) call out all the animals in order, by memory!

Pro Level: Ask your child to spell or even draw the animals that (he / she) remembers on paper!
